1. STATEMENT			
Novelty (N)	Claims	15 and 16	YES
	Claims	NONE	NO
Inventive Step (IS)	Claims	NONE	YES
	Claims	15 and 16	
Industrial Applicability (IA)	Claims	15 and 16	YES
	Claims	NONE	NO

#### 2. CITATIONS AND EXPLANATIONS

Claims 15 and 16 lack an inventive step under PCT Article 33(3) as being obvious over Guillaumet et al US 5,420.132 in view of Guillaumet et al US 5,439,909. Guillaumet et al '132 teach substituted benzodioxins as recited in the claims. See, for example, column 1 lines 30-70 and column 2 lines 1-5 where R<sub>2</sub> is hydrogen and R<sub>3</sub> is alkyl, e.g. methylpropyl which is substituted with aryl. The reference differs from the recited claims in that chloro is not specifically disclosed as a substitutent on the aryl, phenyl, group. However, Patentees, particularly in view of Guillaumet et al '909 teach analogous compounds, that the aryl groups may be optionally substituted and that these optional substitutents include halogen, read chloro. See, for example Guillaumet et al '909 column 1 lines 30+, column 25 lines 10-60 particularly column 3 lines 5-15.

Claims 15-16 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
